Interior Layout

With the 560, Lagoon has gained a significant lead in terms of comfort, ergonomics, style and choices of layouts unmatched by any other catamaran of her size, including up to 5 totally independent cabins and a choice between a central or lateral (portside hull) galley. The 560, the ultimate voyager's catamaran, boasts all the advanced features developed by Lagoon on other models (infusion-moulded construction, a "gull-wing" bridgedeck, vertical windows for the saloon, spacious and light-filled cabins, etc.).
